

## Protect It!™ Surge Suppressors

- ▶ Up to 3690 Joules
- ▶ Up to \$250,000 Ultimate Lifetime Insurance
- ▶ Up to 10 AC Outlets and 25 ft. Power Cord
- ▶ Telephone/Modem/Fax, Cable/Satellite and Network Options
- ▶ All-Metal and Flame-Retardant Plastic Housings
- ▶ Transformer Outlet Options

### Provide Complete, Reliable Power Protection

Tripp Lite Protect It! Surge Suppressors are your equipment's best defense against damage from surges, spikes and line noise. This popular surge suppressor line offers the widest range of quality products at economical prices. Features include up to 10 AC outlets and 25 ft. power cords, all-metal and flame-retardant plastic housings, widely-spaced outlets to accommodate multiple transformers and more. Protect It! Surge Suppressors are designed to deliver reliable protection for any piece of equipment, no matter what your application.

### Deliver Up to 3690 Joules of Surge Suppression

Protect It! Surge Suppressors provide the highest UL-verified joule ratings of any surge suppressors in their class. Joule ratings measure a surge suppressor's ability to handle surges; more joules mean more protection. In addition, select models provide complete EMI/RFI line noise filtering to eliminate audio static and video "snow."

### Protect Equipment on Every Connection

Protect your valuable computer and electronics investments from surge damage on every connection (AC, telephone/modem/fax, cable/satellite and network) with Protect It! Surge Suppressors. If you have a modem, coaxial or network line connected to your equipment, you have opened a "back door" for damaging surges to enter. Select models feature surge-protected modem, coaxial and/or network connectors that close this "back door," completely safeguarding your equipment against surge damage.

### Cover Equipment with Up to \$250,000 Insurance

Up to \$250,000 Ultimate Lifetime Insurance guarantees your equipment will stay safe from surge damage, including direct lightning strikes, for life. Unlike competitors' policies, Ultimate Lifetime Insurance coverage begins the moment you purchase your Protect It! Surge Suppressor, with no forms to fill out or send in. In addition, all Protect It! models are backed by a Lifetime Product Warranty and a rapid-response, no-questions-asked replacement policy unmatched in the industry.

"I found Tripp Lite's product quality and customer support to be head-and-shoulders above the field."  
*Kraft Foods, Alane Watkins, Systems Administrator*

*Protect It! Surge Suppressors offer a wide range of user-friendly features designed to protect virtually every application.*

## AC Protection

Protect up to 10 pieces of equipment against damaging surges and disruptive EMI/RFI line noise on the AC line. Protect It! AC outlets are

backed by up to 3690 joules of surge suppression which provide the highest levels of protection for sensitive electronics.

## Telephone/Modem/Fax Protection

Built-in RJ11 jacks featured on many Protect It!

Surge Suppressors safeguard computers from damage on the telephone/modem/fax line or home theater systems from damage on the pay-per-view/DVR line. Select models protect up to two telephone lines simultaneously. Other models feature a built-in splitter (one RJ11 jack in and two RJ11 jacks out) which allow you to simultaneously connect and protect two devices sharing a single line.

## Cable/Satellite Protection

Surge-protected coaxial "F"

connectors found on select Protect It! Surge Suppressors safeguard a variety of devices (WebTVs, televisions, VCRs, DVD players, TV tuner cards and cable modems) on cable, antenna or satellite lines. TLP810SAT features two sets of gold-plated connectors to simultaneously protect cable/antenna and satellite lines.

## Network Protection

TLP810NET and TRAVELER100BT feature surge-protected RJ45 jacks to safeguard

computers that rely on a network connection, whether it's a corporate Ethernet or the output from a cable or DSL modem.

## Widely-Spaced Outlets

Protect It! Surge Suppressors can accommodate multiple transformers.

## Rugged, All-Metal Housing

TLM606, TLM606HJ, TLM626 and TLM626TEL15 feature heavy-duty all-metal housings for extra safety and durability.

## Integrated Child-Safety Covers

Integrated child safety covers on select models slide forward to guard outlets when not in use.

## Diagnostic LEDs

Identify power problems before they affect your valuable equipment with diagnostic LEDs. A

"GROUNDED" LED on select models indicates a properly-grounded wall outlet.\* A "PROTECTED" LED on select models indicates that adequate surge suppression is available. If the "PROTECTED" LED ever goes out, return the surge suppressor to Tripp Lite for a free replacement.

\* A properly-grounded outlet is necessary for all surge suppressors to adequately protect your equipment.

## Slim, Compact Design

TMC-6 and MT6PLUS are perfect for use under desktop computer monitors or notebook

computers. They include individual front-panel switches.

## In-Line Design

TRAVELERC6 and TRAVELERC8 place AC line surge protection between your notebook computer's (or PDA's) power adapter and the

power cord leading to the wall outlet.

## Multiple Mounting Options

Integrated keyhole slots allow you to securely mount many models on walls or desks.

## 120V/240V Compatible

TRAVELERC6 and TRAVELERC8 operate on any voltage worldwide, automatically switching between 120V or 240V AC power.

## Compact Size for Notebook Computer Protection

Select Protect It! Surge Suppressors provide all the power protection of larger surge strips in a compact, direct plug-in design that slips easily into any briefcase or notebook bag.

## Retractable Plug

TRAVELER and TRAVELER100BT feature a retractable plug which eliminates scratches to your equipment or tears on the inside of your notebook bag.

## Right-Angle Plug

A variety of power cord lengths (up to 25 ft.) allows you to place your surge suppressor wherever you need it.

In addition, right-angled plugs on many models keep power cords out of the way so equipment and furniture can be moved flush against the wall.

## Convenient Cord Management

TLP707TEL lies on its side and provides convenient cord management for regular plugs and multiple transformers.

## Audible Alarm

If you are unable to monitor the "PROTECTED" LED, because the surge suppressor is located under a desk, an audible alarm on select models will alert you to potential problems.

## Power It!™ Power Strips

- ▶ All-Metal Housing
- ▶ Up to 10 AC Outlets
- ▶ Up to 15 ft. Power Cord
- ▶ Multiple Mounting Options
- ▶ Lifetime Warranty

### Supply Power to Every Application

Tripp Lite Power It! Power Strips provide convenient multiple outlets for appliances, power tools, lighting and other equipment. Featuring trouble-free designs, heavy-duty all-metal housings and high-quality Tripp Lite manufacturing, Power It! Power Strips are built to last! In addition, Power It! models are backed by a Lifetime Product Warranty and a rapid-response, no-questions-asked replacement policy unmatched in the industry.

### Deliver Premium Features

Tripp Lite combines all of the premium features found separately in competitive models into one versatile power strip series. All models feature rugged, all-metal housings that stand up to the most demanding environments. Up to 10 AC outlets are available to connect a large assortment of equipment. In addition, all models feature a transparent, locking safety cover to eliminate the risk of accidental shut off.

### Feature Focus

#### Rugged, All-Metal Housing

Heavy-duty all-metal housings provide extra safety and stand up to the toughest environments.

#### Locking, Transparent Safety Cover

Locking safety cover eliminates the risk of accidental shut off. Transparent design allows you to see the illuminated on/off switch.

#### Circuit Breaker

Circuit breaker (15- or 20-amp) prevents dangerous system overloads.

#### Illuminated On/Off Switch

Illuminated on/off switch delivers one-touch power control for all connected equipment.

#### Widely-Spaced Outlets in a Variety of Configurations

Up to 10 widely-spaced outlets can accommodate multiple transformers and are arranged in an assortment of configurations, including right-angled, side-by-side and end-mounted.

#### Multiple Mounting Options

Convenient keyhole slots or flanges provide secure mounting options for a variety of applications. TLM1015NC features adjustable brackets for additional mounting flexibility.

### Specifications

## Protect It!™ Safety Series Surge Suppressors

- ▶ Up to 3600 Joules
- ▶ Up to \$100,000 Insurance
- ▶ Up to 8 AC Outlets
- ▶ Up to 25 ft. Power Cord
- ▶ All-Metal Housing
- ▶ OSHA Yellow Color

### Provide Industrial-Strength Protection

Protect It! Safety Series Surge Suppressors provide industrial-strength surge and line-noise protection for a variety of tools and appliances: drills, saws, sanders, compressors, chargers, pumps and more. Premium features and rugged all-metal housings make these models ideal for every workshop, garage, laboratory, industrial facility and construction site. High-visibility OSHA yellow color alerts user and others that power cords and tools are in use.

### Deliver Premium Features and Insurance

Protect It! Safety Series Surge Suppressors provide the highest UL-verified joule ratings of any surge suppressors in their class. Joule ratings measure a surge suppressor's ability to handle surges; more joules mean more protection. In addition, all models filter disruptive EMI/RFI line noise to improve the performance of connected equipment. Up to \$100,000 Ultimate Lifetime Insurance guarantees equipment will stay safe from surge damage, including direct lightning strikes, for life. All models are backed by a lifetime limited warranty.

## Feature Focus

#### "Protected" LED

Confirms that surge suppression components are protecting connected equipment.

#### Outlet Safety Covers

Shield unused outlets from debris and accidental contact.

#### Multiple Mounting Options

Integrated keyhole slots on bottom panel provide convenient wall or bench mounting.

#### Illuminated ON/OFF Switch with Integrated Circuit Breaker

Provides power control over connected equipment. Breaker guards against dangerous system overload.

#### Rugged All-Metal Housing

Stands up to the harshest environments.

#### Widely-Spaced Outlets

Accommodate multiple transformers without blocking other outlets.

#### Cord Wrap with Hang Holes

Provides convenient cord management.

## Specifications

## Power It!™ Safety Series Power Strips

- ▶ Up to 8 AC Outlets
- ▶ Up to 25 ft. Power Cord
- ▶ GFCI Plug Options
- ▶ All-Metal Housing
- ▶ OSHA Yellow Color

### Provide Safe, Dependable Power

Power It! Safety Series Power Strips provide a reliable source of AC power for a variety of tools and appliances: drills, saws, sanders, compressors, chargers, pumps and more. Premium features and rugged construction make these models ideal for every workshop, garage, laboratory, industrial facility and construction site. High-visibility OSHA yellow color alerts user and others that power cords and tools are in use.

### Deliver Premium Features

Protect It! Safety Series Power Strips combine all of the premium features found separately in competitive models into one versatile power strip series. All models feature all-metal housings that stand up to the most demanding environments. Select models feature a GFCI plug with a resettable breaker. In addition, all models are backed by a lifetime limited warranty.

## Feature Focus

#### GFCI Plug

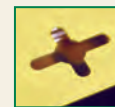

GFCI plug on select models protects users from electrical shock in wet or humid environments.

#### Outlet Safety Covers

Shield unused outlets from debris and accidental contact.

#### Multiple Mounting Options

Integrated keyhole slots on bottom panel provide convenient wall or bench mounting.

#### Illuminated ON/OFF Switch with Integrated Circuit Breaker

Provides power control over connected equipment. Breaker guards against dangerous system overload.

#### Rugged All-Metal Housing

Stands up to the harshest environments.

#### Widely-Spaced Outlets

Accommodate multiple transformers without blocking other outlets.

#### Cord Wrap with Hang Holes

Provides convenient cord management.

# Tripp Lite—Trusted Worldwide for Reliable Power Protection and Connectivity Solutions

## Power Protection & Power Supply

**UPS Systems**—Support equipment during blackouts and brownouts. Shield equipment from damaging surges and line noise. Standby, line-interactive and on-line (including 3-phase) options. 300VA to 80kVA.

**Surge Suppressors**—Including the world's most trusted premium surge suppressor, the Isobar®! Protect equipment from damaging surges and line noise. Up to 12 outlets; up to 5700 joules. Strip, rackmount, direct plug-in and in-line models available.

**Inverters and Inverter/Chargers**—DC-to-AC inverters and inverter/chargers. Up to 3600 watts.

**Home/Business Theater Solutions**—Power protection and connectivity solutions for audio/video components, home automation and security systems.

**Healthcare/Medical Products**—Medical-grade (UL 60601-1) and hospital-grade plug/receptacle solutions: UPS systems, isolation transformers, mobile power retrofit kits, power strips, surge suppressors and more.

**Power Strips and PDUs**—Multiple outlets wherever you need them. Strip and rackmount options up to 40 outlets.

## Connectivity

**KVM Switches**—Control multiple PCs or servers with a single keyboard/monitor/mouse console. 2-, 4-, 8-, 16- and 32-port options.

**Cables**—A full line of connectivity solutions including Cat6/5e/Network, Fiber Optic, USB/FireWire®, Computer, Easy Pull, SCSI/Fibre Channel, Audio/Video and more.

### Surge Suppressor/ Power Strip Extension Cables

- Convert a tightly-spaced outlet into a transformer-friendly outlet
- Create two outlets from a single outlet

P022-001

P022-001-2

## And More!

**Notebook Accessories**—A full line of cases/bags, peripherals, power protection, cables/connectivity, stands and more.

**Power Management Tools**—PowerAlert UPS Management Software, WatchDog Service Monitoring/Rebooting Software, SNMP cards and more.

**Premium Rack Systems & Accessories**—Organize and secure network rackmount equipment.

**UPS Replacement Batteries (R.B.C.)**—Extend the operating life of older UPS systems.

**External Battery Packs and Accessories**—Extend the runtime or enhance the functionality of UPS systems.
